

Hands-on ML engineer with a data-science background and experience coordinating a small cross-functional working group. Emphasizes analyst mentoring, collaboration, and reviewable technical delivery.

Professional Experience

Northstar Transit Labs (fictional) <i>ML Engineer</i>	2022–present
○ Built a monitored document-classification service with human review and reproducible evaluation datasets. ○ Reduced manual triage time by 35% in a fictional internal pilot while preserving reviewer approval. ○ Built an internal retrieval assistant with source citations and an evaluation set. ○ Human approval retained Monitored delivery	
Meridian Analytics (fictional) <i>Data Scientist</i>	2018–2022
○ Used Python and SQL for forecasting, experiment analysis, and dashboards. ○ Coordinated a small cross-functional working group and mentored junior analysts.	
Example University (fictional) <i>Independent research project</i>	2017–2018
Evaluated uncertainty in image classification on a synthetic dataset and shared reproducible notebooks internally. This was not a peer-reviewed publication.	

Core Expertise

Collaboration: Cross-functional working-group coordination and junior-analyst mentoring.
Engineering: Python, SQL, model evaluation, observability, and human review.

Relevant Project Evidence

Coordination: At Meridian, coordinated a small cross-functional working group alongside forecasting, experiment-analysis, and dashboard work.
Mentoring: Mentored junior analysts while contributing hands-on forecasting, experiment-analysis, and dashboard work at Meridian.

Education & Profile

Example University (fictional) <i>BSc in Computer Science</i> Fictional degree for the public demo.	2017
Profile: Fictional portfolio example
